-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1761

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Isom et al (EP 1174039) and Ang (EP 1068809) in view of Noordam et al (US 5552151), De Haan et al (EP 0867124), and Schuppiser et al (US 5446014).

Isom et al (EP 1174039) disclose a conventional cheese process where the cheese is coated with an anti-caking agent (e.g. cellulose) and natamycin (see entire document, especially Figure 1, paragraph 0004, and claims 8 and 9).

Ang (EP 1068809) discloses treating cheese (e.g. shredded) with natamycin and an anti-caking agent such as cellulose, microcrystalline cellulose, starches and combinations thereof (see entire document, especially paragraphs 0027-0029, and 0037)

The claims differ as to the use of a thickening agent.

Noordam et al (US 5552151) disclose stable natamycin compositions for application to cheese comprising natamycin and xanthan as a thickening agent (see entire patent, especially claims 1, 4, and 6).

De Haan et al (EP 0867124) disclose an anti-fungal composition for application to cheese comprising natamycin and xanthan (see entire document, especially page 3, lines 20-29).

Art Unit: 1761

With respect to claim 9, Schuppiser et al (US 5446014) disclose the use of xanthan gum to provide a precipitate-free composition to prevent nozzle clogging during agricultural treatment (see entire document, especially claim 1).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use xanthan as a thickening agent in combination with natamycin as taught by Noordam et al (US 5552151) and De Haan et al (EP 0867124) in that of Isom et al (EP 1174039) and Ang (EP 1068809) because xanthan serves to improve the stability of a natamycin composition.

Reddy (US 5626893) is cited as of interest to the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie Wong whose telephone number is 571-272-1411. The examiner can normally be reached on Tuesday-Friday.
